

IT Skills Assessment Workshop using the SFIA Framework

Workshop Course 3931 • 1 Day

You Will Learn How To:

- Improve IT performance through a better alignment of staff skills
- Plan a practical approach to utilizing SFIA within your organization
- Categorize the job roles and skills of your staff
- Identify skill deficiencies within your organization
- Align IT and HR functions within your organization

Workshop Activities Include:

- Defining boundaries for your SFIA activities
- Identifying and mapping IT job roles and levels
- Creating an approach to identify skill gaps
- Tailoring templates to suit your organization

About This Course: This course is exclusively for private team training at your preferred location, and builds on the knowledge gained from Course 3930: Defining IT Skills, Roles and Responsibilities using the SFIA Framework. In this highly interactive workshop, you will receive guidance from a certified SFIA instructor as you apply the SFIA Framework directly to your organization's environment.

Course Content

Workshop Course 3931 • 1 Day

About SFIA

SFIA (Skills Framework for the Information Age) is an internationally recognized open source IT skills framework to manage the IT Skills of your workforce to meet your business requirements.

SFIA defines 97 professional IT job skills to seven levels of responsibility, from junior first post to senior CIO. Based on the practical experiences of thousands of contributors for over a decade, SFIA offers pragmatic IT skills management in a language easily understood by IT, HR and L&D functions. SFIA is an effective method for updating your organization's job roles and competencies.

Learning Tree is an Accredited SFIA Partner and can provide certified

SFIA instruction (Course 3930) and coaching as well as this more advanced implementation course.

“ Learning Tree's degree of professionalism sets them apart from other training companies. I've brought a number of Learning Tree courses to my location and the investment has definitely been worth it. ”

— D. Ridley, General Manager,
Technical Services
Samsung
